

Question 3 - What do you think about the Council's vision for how the district will be in 20 years time?

The Plan offers a clear vision with admirable aims for providing the people of Tandridge with a favourable lifestyle. However the vision does not marry well with some of the proposed options of offer. If large numbers of new homes are built it will not be a place with green and open spaces, the green belt and our heritage sites will have been decimated, our larger settlements and hamlets will be small towns and the congestion and pollution will lead to stresses and ill health.

If the vision is to be achieved then better controls will be needed over the number, type and location of new homes, investment in public transport and communications will help address congestion and more rural parking will assist with ensuring the sustainability of rural communities by allowing residents to access local shops.
